

HEAT PUMPS

The Emmeti range of heat pumps is vast and comprehensive. The entire range can be purchased in Ireland through C-Mc Energy. Many factors need to be considered when designing a heating system and choosing an adequately sized heat pump is very important. C-Mc Energy offers expertise and design solutions for projects of all sizes.

AIR TO WATER HEAT PUMPS

The new series of air to water heat pumps with axial fans are mono-block in design and use the more environmentally friendly R410A refrigerant. The range is designed for under floor and low temperature radiant panel heating, delivering far better efficiency than conventional heat pumps.

Commissioning, if required, is available at a charge of €500.00 (standard discounts apply)

GEOTHERMAL HEAT PUMPS

Our Geothermal range of heat pumps are single body type and are suitable for residential and commercial use. They are recommended for indoor installation. Due to their tidy design and compact size they are easy to install in small spaces and are easy on the eye.
