

REMS TOOLS

MINI PRESS (NI CAD)

Cordless radial press with automatic circuit control
Pipe pressing joints \varnothing 10–40 mm, 3/8" - 1 1/4". REMS pressing tongs Mini.
REMS Mini-Press ACC – universal up to \varnothing 40 mm / 1 1/4".

Super light, super small, super handy. Secure crimping in seconds. Optimum weight distribution for single-hand operation. Secure seating of pressing tongs by automatic locking. Assortment of REMS pressing tongs Mini for all common press fitting systems. Overall length of less than 34cm, therefore crimping also possible in particularly tight areas

Model	Code	Price €
Mini Press Ni-Cd	080-REM-578011	1,052.13

MINI PRESS LI-ION (Including 3 Tongs)

The high energy density of the **Li-Ion batteries** allow for approx **50% more presses** at **30% less weight**. Powerful **14.4 V battery motors press 20% faster**. Environmentally friendly due to being cadmium free. Super light. REMS Mini Press ACC Li-Ion drive unit with battery only 2.4kg. Cordless radial press Li-Ion with automatic circuit control for producing pipe **pressing joints 10-40mm in diameter**. Robust planetary gear, eccentric reciprocating pump and **compact powerful hydraulic system**, safety tip switch. Overall length of less than 34cm, therefore crimping also possible in particularly tight areas

Model	Code	Price €
Mini Press Li-ion with 3 Tongs	080-REM-578012	1,528.23

AKKU PRESS

Cordless radial press with switch-off signal

Pressing joints \varnothing 10–108 mm / 3/8 - 4". REMS pressing tongs,
REMS Akku-Press – universal up to \varnothing 108 mm / 4".

Secure crimping in seconds. Optimum weight distribution for single-hand operation. Automatic locking of pressing tongs.

Model	Code	Price €
Akku Press Ni-Cd	080-REM-571011	1,191.11
Akku Press Li-ion	080-REM-571014	1,350.48

MINI PRESS TONGS & TH TONGS

During the crimping operation pressing forces of up to 100 kN (10 t) may apply at the pressing jaws which have to be safely absorbed. Therefore REMS pressing tongs are made in forged and specially hardened, high-strength steel. The specific pressing contour is precisely machined and shaped together with the required outer machining of the pressing jaws and the denomination of the pressing contour and pipe size - in one operation on CNC production centres. Thanks to the specific tempering of the pressing tongs by in-house hardening an ideal combination between hardness and toughness is being reached. This manufacturing process guarantees that the machined pressing contour will be transferred correctly to the pressing joint with a long service life.

Model	Code	Price each
Mini Press Tongs 16/20/26/32	080-REM-578000	106.25
TH Tongs 16	080-REM-570460A	186.95
TH Tongs 20	080-REM-570470A	186.95
TH Tongs 26	080-REM-570475A	200.73
TH Tongs 32	080-REM-570480A	232.91
TH Tongs 40	080-REMS-570490A	285.00

FRIGO 2"

Electric pipe freezing unit

Easy, fast freezing of pipes which are not drained. Closed refrigerant circuit. Environmentally safe. CFC-free.

For maintenance, repair, extensions of piping systems. Refrigerant: R-404A, CFC-free.

Steel, copper, plastic, composite pipes \varnothing 1/8–2", \varnothing 10–60 mm.

REMS Frigo 2 – electrically freezing instead of draining.

Super fast up to 2". High cooling capacity, e.g. 3/4" steel pipe in only 9 min*. Very small, patented deep-freezer heads, quickly assembled.

Model	Code	Price €
Frigo 2 up to 1 1/4"	080-REM-131011	1,325.00
Frigo 2 up to 2"	080-REM-131160	1,481.25

REMS

Hand pressure testing pump for pressure and tightness testing of piping systems and receptacles up to 60 bar/870psi
